Projects

Real Time Nail Disease Detection Using YOLO :

College Project [Link]
- Developed a web-based application for early-stage nail disease detection using Streamlit, accessible on mobile devices via Ngrok. Integrated YOLO (You Only Look Once) for real-time nail detection and used a lightweight CNN model for disease classification on a custom nail image dataset.

Dairy Management System :

College Project [Link]
- Developed a modern Dairy Management System using HTML, CSS, JavaScript, PHP, and MySQL technologies. Added features including Admin, Staff, and Customers.

Document Scanner Using OpenCV:

College Project [Link]
- Designed and developed an application using the OpenCV
- A Document Scanner using OpenCV leverages computer vision techniques to detect, align, and enhance images of documents for clearer readability.
- By applying edge detection, contour finding, it scans from photos & convert JPG to PDF
